

JUnit 5 Release Notes

Stefan Bechtold, Sam Brannen, Johannes Link, Matthias Merdes, Marc Philipp,
Christian Stein

Version 5.4.0-SNAPSHOT

Table of Contents

- 5.4.0-M1 1
 - JUnit Platform 1
 - JUnit Jupiter 1
 - JUnit Vintage 1
- 5.3.1 2
 - JUnit Platform 2
 - JUnit Jupiter 2
 - JUnit Vintage 3
- 5.3.0 3

This document contains the *change log* for all JUnit 5 releases since 5.3 GA.

Please refer to the [User Guide](#) for comprehensive reference documentation for programmers writing tests, extension authors, and engine authors as well as build tool and IDE vendors.

5.4.0-M1

Date of Release:

Scope:

For a complete list of all *closed* issues and pull requests for this release, consult the [5.4.0-M1](#) milestone page in the JUnit repository on GitHub.

New Features and Improvements

-

5.3.1

Date of Release: September 9, 2018

Scope: Bug fixes since 5.3.0

For a complete list of all *closed* issues and pull requests for this release, consult the [5.3.1](#) milestone page in the JUnit repository on GitHub.

JUnit Platform

Bug Fixes

- An `OutOfMemoryError` regression introduced in JUnit 5.3.0 has been fixed.
 - Specifically, the `NodeTestTask` used by implementations of `HierarchicalTestEngine` (such as the Jupiter and Vintage test engines) no longer retains references to contextual state after a node has completed execution. This allows state such as instances of test classes to be properly garbage collected by the JVM.
 - Previously, a `NodeTestTask` instance was created for each `TestDescriptor` before starting execution. Now they are created on the fly and can be garbage collected by the JVM after the enclosing container has finished.
- The `OpenTest4J` dependency has been updated to 1.1.1 to fix a serialization incompatibility between 1.0.0 and 1.1.0 that caused failure messages to be discarded when used from Gradle and potentially other tools and IDEs.

JUnit Jupiter

Bug Fixes

- Invocations of `assertThrows()` that are passed a method reference for an overloaded method with a `void` return type once again compile.
 - For example, given an instance of `java.lang.Object` stored in a variable named `object`, `assertThrows(Exception.class, object::wait)` compiled against JUnit 5.2.0, failed to compile against JUnit 5.3.0, but now compiles against JUnit 5.3.1.

Breaking Changes

- In order to revert the aforementioned breaking change, variants of `assertThrows()` introduced in JUnit 5.3.0 that accept `ThrowingSupplier` arguments have been removed.

JUnit Vintage

No changes

5.3.0

Date of Release: September 3, 2018

Scope: Parallel test execution, output capture for `System.out` and `System.err`, new `TestInstanceFactory` extension API, custom test sources for dynamic tests, promotion of the dynamic test API from *experimental* to *maintained* status, discontinuation of the `junit-platform-gradle-plugin`, deprecation of the `junit-platform-surefire-provider`, as well as various minor improvements and bug fixes.

For complete details consult the [5.3.0 Release Notes](#) online.
